TYER LEINSTER G. MERCADO

San Roque, Rosario, Batangas | +63 907 898 5125 | leinster.tyer12@gmail.com | tyermercado.github.io

PROFESSIONAL SUMMARY

Backend and Full-Stack Developer with experience progressing from data operations into professional software development. Builds and maintains production Laravel/PHP and C#/.NET applications, with expertise in relational database design, API development, automated workflows, testing, and performance optimization. Experienced in Flutter Android development and API integration, with a focus on delivering reliable, maintainable software.

TECHNICAL SKILLS

Core Languages & Frameworks: PHP 8.3, Laravel 12, C#, .NET Framework 4.8, Dart, Flutter, JavaScript, SQL

Backend & Data: MySQL, Eloquent ORM, Laravel Migrations, UUIDs, Laravel Queue/Mail, REST/HTTP endpoints, PHPOffice, DomPDF, Drift/SQLite

Testing & Tools: Pest PHP, MSTest, Git, Postman, Riverpod, Salesforce, Salesforce Data Loader, D&B; Hoovers, Microsoft Excel

Additional Project Exposure: .NET 8, WPF/MVVM, SQL Server, Java/Spring Boot, Python/Django, React, HTML/CSS, Tailwind CSS

PROFESSIONAL EXPERIENCE

Cybr, Inc. / TrueBPO, Inc. | *Oct 2025 – Present*

Junior Programmer | *Feb 2026 – Present*

- Develop and maintain a production public-sector management system using Laravel 12, PHP 8.3, MySQL, and Tailwind CSS; delivered five digital government-service workflows and 10+ administrative modules across backend and frontend components.
- Automated request and document-processing workflows with reference-code tracking, email notifications, and queued DOCX/PDF generation.
- Designed relational database structures and application models; maintain 40+ Pest tests covering validation, background jobs, business logic, and HTTP endpoints.
- Developed San Roque BHW Connect, a Flutter/Dart Android client using Riverpod and layered MVVM, integrated with a Laravel API for Sanctum authentication, household/resident management, search/filtering, health-service records, and spreadsheet/report workflows.
- Implemented offline-capable household and Sanidad data using Drift/SQLite, durable synchronization, UUID-based mutations, conflict handling, and connectivity retries.
- Developed and maintained a C#/.NET 8 WPF/MVVM OCR application integrating Ollama and Qwen3-VL on RunPod for remote historical-record processing, including asynchronous processing, retries, structured JSON parsing, and inference optimization.
- Modernized a legacy C#/.NET Framework 4.8 data-entry application, achieving 16× faster Excel imports and 23× faster image selection; improved reliability with transactions, crash recovery, validation, autocomplete, and 60 MSTests.

Data Entry Operator | *Oct 2025 – Feb 2026*

- Validated source records, corrected discrepancies, prepared datasets, and summarized quality findings before submission; later promoted internally to Junior Programmer.

Infor PSSC Inc. | *Apr 2024 – Mar 2025*

Field Ops Business Manager, Associate

- De-duplicated thousands of Salesforce accounts against D&B; Hoovers records and corrected D-U-N-S numbers, account hierarchies, and parent-child relationships for a global data-governance initiative.
- Certified and mass-uploaded Everclean account updates through Salesforce Data Loader to improve downstream reporting and sales targeting.

Infor PSSC Inc. | *Feb 2023 – May 2023*

Data Governance Intern (Data Clean-Up)

- Supported an enterprise CRM data-cleanup project used for global sales targeting and reporting.

EDUCATION & SELECTED CREDENTIALS

Bachelor of Science in Information Technology | University of Batangas | 2019–2023

Dean's Lister (AY 2020–2021, 2nd Semester) | Most Outstanding Intern

Microsoft Azure Fundamentals (2024) | DataCamp Associate Data Analyst in SQL | Postman API Fundamentals Student Expert (2024)
